**5 - What aspect of Prof. /Dr. Chisom Ubabukoh's approach to teaching best helped your learning?**

- He provides the most efficient and easy technique to answering complicated questions.
- He covered the question sheets in a way which allowed me to follow the logic of how to answer questions.
- he explained stuff more clear compared to the lecture
- helpful and explains stuff in a good way
- He has been excellent at explaining the key concepts in the unit, which has increased my understanding
- He goes through everything slowly during seminars and is very encouraging
- answers all of my questions patiently
- He makes things clearer and his approach to answer a question is understandable.
- The style of engagement and interaction of students in Dr. Ubabukoh's tutorial classes encouraged me to ask questions and point out the questions which I do not understand.
- course revision
- ( - ) - he spend A LOT OF TIME doing the first exercises, which were easier and usually never solved the last ones - he would laugh if somebody would give a wrong answer, which I do not think is right, since he was there to teach us not to laugh at the fact that we do not understand; that's why we were attending the class, to learn more - I did not enjoy this class
- Went through everything in a clear way, explaining things much better than was done so in the lectures.
- Very engaging, well organized tutorials, dedicated and focused.
- He revises all the formulas and properties in maths related to the questions to be done in the tutorial .He used to show us the graphical representation of the function or line which helped me a lot to understand math better.
- He is so accessible and understands that to learn a concept you may need to start from the basics a little bit. He really goes through every step of working out that he goes through, and quite honestly, everything I have learnt this term is a directly result of his teaching in tutorials, NOT from the lectures.
- He started off with revising the concepts and workings of the topic and this really helped me understand the concept and how to work to find an answer.
- if you don't understand something he will pause what is being taught and make sure you understand what is being taught
- Answers very well explained, very productive tutorials
- Clear, responded to questions well
- He started from the basic so, even if you don't really understand what was going on during the lecture, he will clarify it.
- He explained the course quite detail but somehow it was too detail until he explained unnecessarily because he was to afraid that we didn't get the teaching.
- He explained topics in easy way.
- he showed us the way in answering question by using numerical examples, which was easier to be understood compared to the ones with alphabetical examples which Dr Mario taught us.
- Was friendly and happy to help.
