5 - What aspect of Prof. /Dr. Chisom Ubabukoh's approach to teaching best helped your learning?

• He explains the solutions in easy and understandable ways, however, he does not seem prepared enough as he doesn't bring solutions with him and therefore doesn't always seem completely sure about the correct answers straight away.

• Clear and concise explanations helped make content simple to understand

• straightforward, easily understandable explanations

• Explaining methods were clear

• Chisom is a very patient and helpful tutor. Always good with emails and always thoroughly explains things. Sometimes goes through tutorial questions a bit slowly meaning time runs out but that's the pay-off for in-depth explaining.

• Checking tutorial work personally which gives the exact feedback we need.

• breakdown and workthourhg all worksheeets.

• writing step by step solutions on the board

• Very caring and gets us engaged

• Very clear

• Very friendly and good at explaining. Got a very clear understanding of the maths as you walked around and checked us all individually and pointed out our mistakes. The 10 minutes at the start where really helpful if we made a mistake.

• Dr. Chisom went through all of the exercise questions in the tutorials, and made sure everyone understood how to answer. He was very helpful and the ideal tutorial leader. He made the tutorials engaging and fun, and checked our work to make sure we hadn't made any mistakes. This is the first tutorial I've had at university where I've received feedback on work I've prepared beforehand, this is definitely the most valuable part of the tutorial.

• very helpful tutorials

• Going through each and every step of the tutorial questions / exam past paper solutions.
